EDUCATION

MANAV RACHNA UNIVERSITY   Faridabad, Haryana
B.TECH in Computer Science & Engineering   2018 – 2022
Grade: 85.6%

GENERAL RAJ SCHOOL   New Delhi, Delhi
XII - PCM   2016 – 2017
Grade: 78%

WORK EXPERIENCE

SELF EMPLOYED (Freelance Web Developer)   July 2022 – December 2023

- Designed websites for more than **60** customers across various industries at **90%** customer satisfaction rate.
- Optimized website performance thus resulting in **15%** increase in user engagement.

AEZMOCORP PVT. LTD. (React JS Intern)   January 2022 – September 2022

- Developed and implemented websites utilizing **React JS** and **Redux** technology ensuring **100%** accuracy rate.
- Build Full Stack website by seamlessly integrating **frontend** to **backend** services.s
- Utilized reusable react components library, thus reducing **40%** development time for new projects.
- Enhanced responsive web design to improve user experience resulting in more than **90%** client satisfaction rate.

CHEGG INDIA PVT. LTD. (Managed Network Expert)   March 2021 – May 2022

- Demonstrated expertise in providing solutions to questions related to Computer Science as a **Question Answer Expert**.
- Successfully solved more than **200** complex questions with an exceptional **accuracy rate of 95%.**

SKILLS

Languages: JavaScript, Java
Web Development: React JS, Redux, HTML, CSS, Node JS, Express JS, Webpack, Material UI
Technology: MongoDB, Git, AWS, SQL, PostgreSQL
Course Work: Data Structures and Algorithms, Object Oriented Programming

PROJECTS

Code-Cart A Mern Stack E-commerce Website [(link)](#)
- Build and deployed a responsive Full Stack E - Commerce website. Implemented the frontend using **React JS, CSS, Context API** and backend using **Node.js, Express.js, MongoDB** for database **and Postman** for **APIs.**
- Optimized project development time by **35%** by using reusable components library and responsive website design.
- Integrated Braintree payments gateway to the website for seamless customer interaction.

Crypto-Tracker [(link)](#)
- Crypto-Tracker is a Cryptocurrency tracking website for tracking the market price of cryptocurrencies.
- Developed using **React, Material UI, Chart JS** for real time monitoring of cryptocurrency ensuring **100%** accuracy.

Netflix Clone ([link](#))
- Designed and deployed a Full Stack Netflix clone. Build the website using **React JS** and **Firebase**. Utilized Redux for state management, resulting in a **25%** reduction in code complexity. Integrated **TMDB API**, **YouTube Trailers.**
- Facilitated secure and streamlined transactions by seamlessly integrating the **Stripe** Payments gateway into the website.

CERTIFICATIONS

AWS Fundamentals Specialization   Amazon
Microsoft Certified: Azure Data and AI Fundamentals   Microsoft
Software Engineering Virtual Internship   Blackbird

ACHIEVEMENTS

- Secured the **2nd** position at Engineering Exploration Project Exhibition by presenting innovative ideas and solutions.
- Demonstrated a **90%** proficiency rate in **JavaScript** and **Java** by earning a Gold Badge on HackerRank.
- Achieved expertise in data structures by solving more than **400** questions at an accuracy rate of **80%**.
